NZIC President Seminar

Part 1. Chemistry and the various avenues it can take you down.

Part 2: “NZIC, why aren’t you a member, already?”

The first part of the talk is one which encompasses a brief history of my journey through Chemistry and a specific avenue involving Materials Chemistry in a multidisciplinary area which led on to many avenues, opportunities and experiences.

The second part is a summary of the organisation, its financial position and events that have occurred over the period of my Presidency. It also highlights some benefits of joining the NZIC for both staff and students.

About our speaker

Michael Mucalo studied at the University of Auckland before positions at DSIR, Wellington and the Government Industrial Research Institute, Nagoya, Japan. In 1995, he was appointed at the University of Waikato where he is now Associate Professor and Associate Dean (Postgraduate). Michael has been president of the NZIC from 2021-2022.
